

15 LIFE ON LAND

The United Nations Sustainable Development Goal 15 aims to protect, restore, and promote the sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, halt soil erosion, and stop biodiversity loss.

Vietnam is currently implementing sustainable management and utilization of forest resources in accordance with the Prime Minister's Decision No. 149/QĐ-TTg, which approves the National Biodiversity Strategy for 2030 with a vision for 2050. The overall objective for 2030 is to increase the area of protected and restored natural ecosystems, ensuring their integrity and connectivity. This will involve conserving biodiversity and using it in a sustainable manner to contribute to economic and social development in line with a green economy, while also actively adapting to climate change. The vision for 2050 is for important natural ecosystems, endangered species, and valuable genetic resources to be effectively restored and conserved. This will result in the full valuation and sustainable use of biodiversity and ecosystem services, providing essential benefits to all citizens and contributing to ecological security, proactive response to climate change, and sustainable national development. DNC has contributed to the protection of land resources by implementing extracurricular programs that educate all students on solid waste collection, waste treatment, and environmental protection practices. At the same time, promoting sustainable practices by integrating sustainability into the curriculum, community education, and collaborating with agencies to raise awareness and promote scientific research, thereby contributing to creating a sustainable future for the university and the country in general.

EVENTS PROMOTING THE SUSTAINABLE USE OF LAND RESOURCES

The 2023 Summer Volunteer Youth Campaign, organized by the Ho Chi Minh Communist Youth Union of DNC, took place in eight provinces in the Mekong Delta from July 9th to 28th, 2023. The campaign saw the participation of nearly 300 students. During the launching ceremony, DNC's Youth Union Secretary outlined the purpose and requirements of the campaign, with a focus on publicizing laws and policies, guiding people to adopt green and environmentally-friendly consumption habits, and promoting the sustainable use of land resources. Additionally, the campaign aimed to mobilize public participation in environmental protection and prepare for nationwide waste separation at the source.

Through this campaign, community organizations, households, and individuals were able to responsibly use land, protect land resources, and address soil pollution caused by their actions.

PROPAGANDA TO PROTECT THE TERRESTRIAL ENVIRONMENT THROUGH THE INTEGRATION OF RELATED ACTIVITIES INTO THE HUMAN AND ENVIRONMENT SUBJECT

DNC has made significant contributions towards protecting the terrestrial environment through its implementation of propaganda activities and organization of events that are integrated into the Human and Environment course. These efforts aim to encourage all students to conserve electricity and water, as well as to protect, restore, and promote the sustainable use of terrestrial ecosystems.

ACTIVITIES FOR THE CONSERVATION AND DEVELOPMENT OF BIODIVERSITY ON LAND

During the 2023 Summer Volunteer Youth Campaign, students from DNC carried out various activities focused on conserving and developing biodiversity on land. These activities included:

Cleaning, clearing, and planting ornamental plants along a 3 km stretch of Bong Vang Road. In addition, they also cleaned the landscape, removed weeds, and planted 300 Red dracaena fragrans in My Hoa Hamlet. The students also scrubbed moss, dug soil to plant flowers, and cleaned the Social Organizations Block in My Khanh Commune. Along with these efforts, they also cleared wild plants along riverbanks to beautify the new rural road at My Long Hamlet, and cleaned and weeded a 3 km section of Nguyen Van Cu Street.

The planting of trees and clearing of bushes along rural roads near the coast in Tan Thanh and Van Khanh Dong communes has contributed to a green, clean, and beautiful landscape.

Additionally, the Youth Nursery Project has been implemented, with 1,000 jungle flame trees being planted along rural roads and 15 volunteers participating in the project.

25 Golden trumpet trees and 25 rose trees were planted, and overgrown shrubs were cleared around the People's Committee of Dong Phu Commune. This created a lush, pristine, and picturesque landscape worth 3 million VND for landscaping and beautification efforts.

Participating in a tree planting event to celebrate the 20th anniversary of Hau Giang Province, DNC Youth Union, in collaboration with the Fatherland Front and other political and social organizations of Dong Phu Commune, planted 100 Dipterocarpus alatus trees along Cay Tram canal in Phu Loi Hamlet. The total value of this effort was 25 million VND.

COMMUNITY EDUCATION ON ECOSYSTEM PROTECTION

DNC Youth Union conducted awareness campaigns to educate the public on maintaining environmental hygiene and promoting sustainable ecosystem development, particularly in remote areas of the following provinces:

Kien Giang organized a "Green Sunday" event in collaboration with the Tan Thanh Commune Youth Union and soldiers from the Xeo Nhai Border Guard Station. The purpose of this event was to collect trash at the Xeo Nhai fishing port, plant trees, and clear bushes along rural roads near the coast. This initiative aimed to protect the marine environment and combat plastic waste.

In Ca Mau, students from DNC responded to the campaign "People Eradicate Mosquitoes and Larvae to Prevent Diseases Caused by Zika Virus and Dengue Fever." They educated local residents on the importance of cleaning up and covering plastic bottles and cans, which can collect water and become breeding grounds for mosquitoes. Additionally, they took action by releasing 300 Siamese fighting fish and guppies in Thuan Hoa A Hamlet to help control the mosquito population.

Dong Thap implemented the "Three Clean Route" model with the goal of creating a trash-free river. As part of this initiative, students from DNC planted 200 Crape myrtle trees along a tourism route and 2 km of periwinkle along a key route in Tan Long Commune. Additionally, they conducted public awareness campaigns for local residents, painted propaganda paintings to promote land conservation, and collaborated with war veterans to collect pesticides in Tan Thanh Hamlet.

WASTE MANAGEMENT IMPLEMENTATION AT DNC

DNC DNC DNC
DNC DNC DNC DNC

To implement waste management at DNC, the university entered into a contract with Do Duy Construction Co., Ltd. to collect the volume of domestic waste and signed a contract with Tin Thanh Technology Development Co., Ltd. to invest in a waste management system on campus. The company is responsible for supplying materials and equipment and installing the wastewater treatment system for DNC.

In 2020, DNC constructed a water reservoir spanning over 3,000 m². This reservoir is linked to the nearby canal system, effectively managing water flow and mitigating the risk of flooding. Additionally, it serves to improve the local ecosystem by providing irrigation for plants, purifying the air by absorbing odors and pollutants such as nitrogen oxides, ammonia, sulfur dioxide, and ozone, and filtering particles from the air. Furthermore, DNC has established an ecological garden spanning over 5,000 m² and has carefully selected and planted a diverse range of trees, with a focus on species that are drought-resistant.

HỢP ĐỒNG THU GOM

- Căn cứ Luật dân sự số 91/2015/QH13 ngày 24/11/2015.
- Căn cứ vào Luật Thương mại số 36/2005/QH11 của Quốc Hội ban hành ngày 14 tháng 6 năm 2005;
- Căn cứ quyết định số 40/2016/QĐ-UBND ngày 30 tháng 12 năm 2016 của Ủy ban nhân dân thành phố Cần Thơ về mức giá Dịch Vụ.
- Căn cứ vào nhu cầu và thỏa thuận giữa các bên.

Hôm nay, Ngày 31 tháng 12 năm 2022, tại Công ty TNHH Xây Dựng Đồ Duy, chúng tôi gồm có:

I. Bên cung ứng dịch vụ (Bên A): CÔNG TY TNHH XÂY DỰNG ĐỒ DUY
- Đại diện: Ông Đỗ Đức Huy Chức vụ: Giám đốc
- Địa chỉ: Số 9B đường số 7, KDC Vạn Phát Cần Khương, P Cái Khế, Q. Ninh Kiều, TPCT.
- Tài khoản số: 7371 0000 373 386 tại Ngân hàng BIDV – CN Hậu Giang.
- Mã số thuế: 1801383236.
- Điện thoại: 0292.6508989 (Kế toán – Tuyết), 0292 6513939 (CSKH - Nhung)

II. Bên thuê dịch vụ (Bên B): TRƯỜNG ĐẠI HỌC NAM CẦN THƠ
- Đại diện: Chức vụ :
- Địa chỉ: 168 Nguyễn Văn Cừ nổi dài, P.An Bình, Q.Ninh Kiều, TP.Cần Thơ
- Mã số thuế: 1801311513
- Điện thoại: 02923.798222
- Sau khi bàn bạc & thỏa thuận hai bên nhất trí ký hợp đồng cung ứng dịch vụ vệ sinh với các điều khoản như sau:

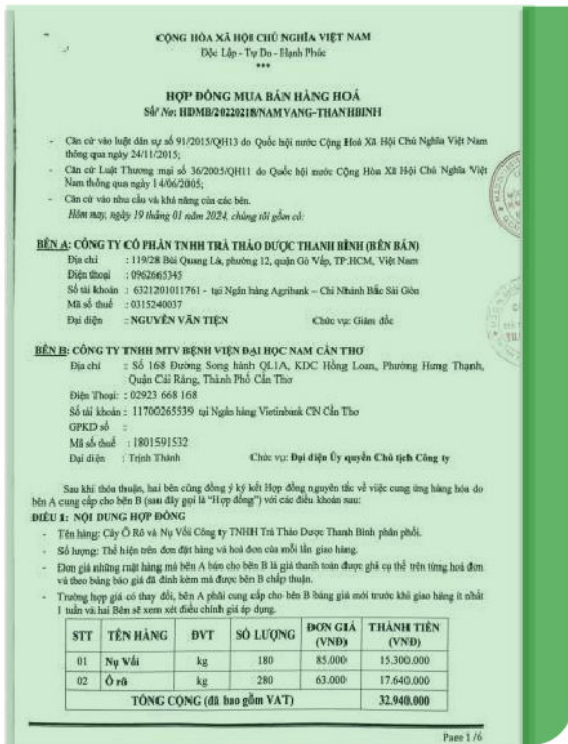

ĐIỀU 1: NỘI DUNG HỢP ĐỒNG

- Bên A đồng ý cung ứng dịch vụ cho Bên B thực hiện công tác thu gom khối lượng rác thải sinh hoạt tại: Trường Đại Học Nam Cần Thơ địa chỉ 168 Nguyễn Văn Cừ nổi dài, P.An Bình, Q.Ninh Kiều, TPCT
- Khối lượng rác trung bình: 129m³/tháng
- Thời gian thu gom: 01 ngày /01 lần.

ĐIỀU 2: GIÁ TRỊ HỢP ĐỒNG VÀ PHƯƠNG THỨC THANH TOÁN

- Giá trị hợp đồng:
 - Đơn giá khoán: 7.000.000 đồng/tháng. (bao gồm thuế GTGT) (Bằng chữ: Bảy triệu đồng trên tháng)
- Phương thức thanh toán: Hàng tháng bên B thanh toán bằng tiền mặt hoặc chuyển khoản cho bên A trong khoản thời gian 07 ngày kể từ ngày nhận chứng từ thanh toán.

In recent years, DNC Institute of Medicinal Research and Development has successfully developed three products: one for gout treatment, one for liver protection, and one for diabetes treatment. All three have been recognized by the Food Safety Department of the Ministry of Health. The raw materials used in these products are sourced from sustainable farms in the Mekong Delta.
